

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1 (original): A wound dressing composition comprising a partially cured polyurethane fluid.

Claim 2 (original): A wound dressing composition according to claim 1, wherein the composition comprises at least 50% by weight of polyurethane components.

Claim 3 (currently amended): A wound dressing composition according to claim 1 ~~or 2~~, wherein the composition has been prepared by mixing a diisocyanate or a polyisocyanate component with a diol or polyol component.

Claim 4 (original): A wound dressing composition according to claim 3, wherein at least 10% of the isocyanate groups originally present in the isocyanate component are still unreacted in the wound dressing composition.

Claim 5 (currently amended): A wound dressing composition according to ~~any preceding~~ claim 4, wherein the absolute amount of unreacted isocyanate in the wound dressing composition is less than about 4wt.%.

Claim 6 (currently amended): A wound dressing composition according to ~~any preceding~~ claim 3, further comprising an additives selected from the group consisting of humectants, plasticizers, hydrocolloids, blowing agents, medicaments, and mixtures thereof.

Claim 7 (currently amended): A wound dressing composition according to ~~any preceding~~ claim 3, wherein the composition has a curing time at 25°C of from about 0.1 to about 100 minutes.

Claim 8 (currently amended): A wound dressing comprising a wound dressing composition according to ~~any of claims 1 to 7~~ claim 3.

Claim 9 (original): A wound dressing according to claim 8, further comprising reinforcing elements to assist removal of the cured polyurethane composition in one piece from a wound.

Claim 10 (currently amended): A wound dressing according to ~~claim 8 or 9~~ claim 8, further comprising drainage elements to assist drainage of exudates from wounds.

Claim 11 (original): A wound dressing kit comprising: (a) a polyurethane prepolymer; and (b) a curing agent for the polyurethane prepolymer, as a combined preparation.

Claim 12 (original): A wound dressing kit according to claim 11, wherein the components (a) and (b) are stored separately in a single package for mixing immediately before use.

Claim 13 (original): A wound dressing kit according to claim 12, wherein package comprises a barrier between the components that can be opened to allow the components to mix inside the package immediately before use.

Claim 14 (currently amended): A wound dressing kit according to ~~claim 12 or 13~~ claim 11, wherein the package comprises a mixing chamber for sterile mixing of the components immediately before use.

Claim 15 (currently amended): A wound dressing kit according to ~~any of claims 11 to 14~~ claim 11, further comprising one or more of the group consisting of reinforcing elements, drainage elements, and a secondary dressing.

Claim 16 (currently amended): A wound dressing kit according to ~~any of claims 11 to 15~~ claim 11, wherein component (a) and component (b) are both liquids at temperatures above 5°C.

Claim 17 (currently amended): A wound dressing kit according to ~~any of claims 11 to 16~~ claim 11, wherein component (a) comprises an isocyanate capped prepolymer.

Claim 18 (original): A wound dressing kit according to claim 17, wherein the prepolymer is prepared by reacting a diisocyanate with compound selected from the group consisting of castor oil, other esters of ricinoleic acid, and derivatives thereof.

Claim 19 (currently amended): A wound dressing kit according to ~~any of claims 11 to 18~~ claim 11, wherein the diol or polyol is selected from the group consisting of castor oil, other esters of ricinoleic acid, and derivatives thereof.

Claim 20 (currently amended): A wound dressing kit according to ~~any of claims 11 to 19~~ claim 11, wherein component (b) comprises a wound therapeutic material selected from the group consisting of antiseptics such as molecular silver, silver sulfadiazine or chlorhexidine; pain relieving agents such as lignocaine; anti-scarring agents such as mannose-6-phosphatem and agents for promoting wound healing such as growth factors, and mixtures thereof.

Claim 21 (canceled)
